

Trail Now Open at Mile 3.1

The Danvers DPW has
completed the rebuilding of
the bridge near DHS.

Bridge and Trail Now Open at Mile 3.1

The Danvers DPW and their contractor have completed the rebuilding of the bridge at mile marker 3.1 (near Danvers High School). This extensive project added a concrete platform and sidings needed to safely support large Electric Division trucks. Stone dust was replaced to ensure as safe and continuous surface, and wooden railings were added at the four ends of the bridge.

We appreciate the support from DPW for completing this work on time, and minimizing disruption to trail users. Thanks to all our trail users for your patience and understanding.
